This section applies to declaration and information requirements for Abandoned Chemical Weapons that are stipulated in subparagraph 1(b) (ii), (iii) of Article III and paragraphs 8, 9, 10 and 17 of Part IV(B) of the Verification Annex. The declarations on Abandoned Chemical Weapons, are subdivided into those made by the Territorial State Party, which has Abandoned Chemical Weapons located on its territory, and those made by the Abandoning State Party, which abandoned Chemical Weapons on the territory of another State.

2. Abandoned Chemical Weapons Declaration Requirements for each State Party

2.1 Overview

Declarations shall be submitted by Territorial and Abandoning States Parties (if the Abandoning State Party is known) not later than 30 days after the Chemical Weapons Convention enters into force for the State Party. A state party which discovers abandoned chemical weapons after EIF for it shall, not later than 180 days after the discovery, submit to the Technical Secretariat all available relevant information concerning the discovered abandoned chemical weapons.

Each State Party should provide all available relevant information on toxic chemicals in accordance with the Annex on Chemicals to the Convention. To assist States Parties in preparing declarations, nomenclature and structural data on the chemicals contained in the Schedules have been compiled in a Handbook on Chemicals (**Appendix 2**).

3.1 Definitions

The following definitions taken from the CWC are to be taken into account when making declarations:

"Abandoned Chemical Weapons" means chemical weapons, including old chemical weapons, abandoned by a State Party after 1 January 1925 on the territory of another State without the consent of the latter.

"Chemical weapons"

- (a) Toxic chemicals and their precursors, except where intended for purposes not prohibited under this Convention, as long as the types and quantities are consistent with such purposes;
- (b) Munitions and devices, specifically designed to cause death or other harm through the toxic properties of those toxic chemicals specified in subparagraph (a), which would be released as a result of the employment of such munitions and devices;
- (c) Any equipment specifically designed for use directly in connection with the employment of munitions and devices specified in subparagraph (b).

"TOXIC CHEMICAL" means:

Any chemical which through its chemical action on life processes can cause death, temporary incapacitation or permanent harm to humans or animals. This includes all such chemicals, regardless of their origin or of their method of production, and regardless of whether they are produced in facilities, in munitions or elsewhere. (For the purpose of implementing this Convention, toxic chemicals which have been identified for the application of verification measures are listed in Schedules contained in the Annex on Chemicals.)

"Tonne" is defined as metric ton, i.e. 1,000 kg.

3.2 Specific explanations

(a) Location

Each **location** where Abandoned Chemical Weapons are discovered or stored is to be declared using declaration forms. It is understood that the location for Abandoned Chemical Weapons may be declared as the place at which they were

The **usability** of Abandoned Chemical Weapons produced between 1925 and 1946 will be assessed on a case-by-case basis. The involved States Parties should submit any information they believe is pertinent in establishing the usability of the Abandoned Chemical Weapons.

(e) **Chemicals not listed in the Schedules**

For **toxic chemicals not listed in the Schedules** in the Annex on Chemicals, the information required for possible assignment of the chemicals to the appropriate Schedule shall be provided, including, where known, the toxicity of the pure compound.

(f) **Munitions**

Munitions are items that directly or indirectly utilise an explosive to disseminate a toxic chemical on the battlefield.

(g) **Sub-munitions**

Sub-munitions refer to either separate elements within munitions or devices that utilise directly or indirectly an explosive to disseminate a toxic chemical on the battlefield.

(h) **Devices**

Devices refers to items that use non-explosive means to disseminate a toxic chemical.

(i) **Equipment**

Equipment refers to items that are part of a chemical weapons delivery system but do not actually contain toxic chemicals or precursors.

(j) **Bulk Containers**

Bulk Containers refer to items that are used for storage or transportation of toxic chemicals.

(k) **Other Containers**

Other Containers refers to items, filled or unfilled with toxic chemicals, that are designed for direct use in the employment of munitions or devices.
