NOTE BY THE TECHNICAL SECRETARIAT

**THE DESTRUCTION OF CHEMICAL WEAPONS
ABANDONED BY JAPAN IN THE PEOPLE'S REPUBLIC OF CHINA**

1. Decision (EC-67/DEC.6, dated 15 February 2012)

The decision entitled “The Deadline of 29 April 2012 and Future Destruction of the Chemical Weapons Abandoned by Japan in the People’s Republic of China” (EC-67/DEC.6, dated 15 February 2012), in which it reads in O.P.8, “Recommends the Conference of States Parties to take note of annual reports of the Council concerning the progress made for the destruction of abandoned chemical weapons from a viewpoint of facilitating the destruction;...”.

2. Progress made for the Destruction of Abandoned Chemical Weapons as per EC-92/DG.29, dated 4 October 2019.

In its decision entitled “The Deadline of 29 April 2012 and Future Destruction of the Chemical Weapons Abandoned by Japan in the People’s Republic of China” (EC-67/DEC.6, dated 15 February 2012), the Executive Council (hereinafter “the Council”) requested the Director-General to provide a report at each regular session of the Council on the overall progress of the destruction of abandoned chemical weapons (ACW).

To date, 74,729 items of ACW have been recovered from over 90 locations within China. This figure includes the items that have already been destroyed. However, it does not include the items buried at Haerbaling, Jilin Province, which are estimated to number over 330,000 ACW items awaiting excavation and recovery (consisting both of items that have already been destroyed and items requiring excavation and identification), nor does it include items at other locations that also have yet to be recovered and declared.

At the end of the reporting period (1 June to 31 August 2019), a total of 55,875 of the 74,729 items of declared ACW on the territory of China had been destroyed. This figure accounts for all items destroyed at the mobile destruction facilities (MDFs) in Nanjing, Shijiazhuang, and Wuhan, as well as the items destroyed in operations at Haerbaling and Harbin, and all of the items transferred from surrounding locations to the MDFs for destruction as at the date mentioned above. During the reporting period, the Technical Secretariat (hereinafter “the Secretariat”) conducted one mission to the Haerbaling site.

The national papers submitted by Japan (EC-92/NAT.2, dated 2 October 2019) and China (EC-92/NAT.3, dated 4 October 2019) note that the destruction operations at the MDF in Nanjing were concluded on 11 June 2012, with the destruction of a total of 35,681 ACW items. The operations at the MDF in Wuhan were concluded in May 2015, with the destruction of 264 ACW items. The destruction operations at the MDF in Shijiazhuang were completed on 17 January 2017, with the destruction of a total of 2,576 ACW items.

The selection of sites for the MDFs in Taiyuan and Guangzhou is ongoing, and progress has been made in the consultations between China and Japan towards preparing for destruction operations at these sites.

Destruction operations at the Harbin MDF started in May 2019. As at the cut-off date of this report, the total number of ACW destroyed at this site reached 1,432.

As at 31 August 2019, the Haerbaling Destruction Facility had destroyed a total of 15,932 items of ACW using two destruction technologies: a controlled detonation chamber (CDC) and a static detonation chamber (SDC). During the reporting period, 1,366 additional ACW items were destroyed, 436 of which were destroyed by the CDC and 930 of which were destroyed by the SDC. To accelerate the destruction of the ACW items, a new destruction facility will be installed in addition to the existing two facilities (CDC and SDC).

During the reporting period, excavation and recovery operations and bilateral investigations were carried out at Songhuajiang River in Jiamusi City, Heilongjiang Province, and at Haerbaling. Moreover, at the Haerbaling site, the first and second phases of the excavation and recovery operations scheduled for 2019 started at burial pit No. 1, where approximately 3,700 ACW items have been recovered. From 14 June to 8 July 2019, a total of 1,143 ACW were transported to the Harbin storehouse from various locations within Heilongjiang Province.

In September 2019, the Chairperson of the Council, together with the Director-General and a Council delegation, visited the Haerbaling destruction site in China. The Council delegation was very appreciative of the spirit of cooperation, openness, and transparency that marked the visit, and confirmed the relevance of visits to ACW destruction sites by delegations representing the Council.

The thirty-first trilateral meeting between China, Japan, and the Secretariat is scheduled to be held in Beijing in December 2019. These meetings are held on a biannual basis and are important occasions for ensuring transparency, discussing technical and practical issues, implementing the projects in accordance with the appropriate verification measures, and planning for future activities.

Finally, the destruction of the chemical weapons abandoned by Japan on the territory of China is scheduled to continue based on the agreed destruction plan, in accordance with which Japan and China regularly report to the Council. The plan includes time frames for the destruction of ACW by Japan, with appropriate cooperation from China. The Secretariat continues to closely coordinate with both China and Japan on the implementation of Council decision EC-67/DEC.6.

3. Progress made for the Destruction of Abandoned Chemical Weapons as per EC-93/DG.15, dated 9 March 2020.

To date, 83,650 items of ACW have been recovered from over 90 locations within China. This figure includes the items that have already been destroyed. However, it does not include the items buried at Haerbaling, Jilin Province, which are estimated to number over 330,000 ACW items awaiting excavation and recovery (consisting both of items that have already been destroyed and items requiring excavation and identification), nor does it include items at other locations that also have yet to be recovered and declared.

At the end of the reporting period (1 September 2019 to 31 January 2020), around 57,700 of the 83,650 items of declared ACW on the territory of China had been destroyed. This figure accounts for all items destroyed at the mobile destruction facilities (MDFs) in Nanjing, Shijiazhuang, and Wuhan, as well as the items destroyed in operations at Haerbaling and Harbin, and all of the items transferred from surrounding locations to the MDFs for destruction as at the date mentioned above. During the reporting period, the Technical Secretariat (hereinafter “the Secretariat”) conducted five ACW inspections in China.

The national papers submitted by Japan (EC-93/NAT. 1, dated 13 February 2020) and China (EC-93/NAT.5, dated 2 March 2020) note that the destruction operations at the MDF in Nanjing were concluded in June 2012, with the destruction of a total of 35,681 ACW items. The operations at the MDF in Wuhan were concluded in May 2015, with the destruction of 264 ACW items. The destruction operations at the MDF in Shijiazhuang were completed in January 2017, with the destruction of a total of 2,576 ACW items.

Destruction operations at the Harbin MDF started in May 2019. During the reporting period, 396 additional items were destroyed. As at the cut-off date of this report, the total number of ACW destroyed at this site reached 1,828.

As at 31 January 2020, the Haerbaling Destruction Facility had destroyed a total of 17,361 items of ACW using two destruction technologies: a controlled detonation chamber (CDC) and a static detonation chamber (SDC). During the reporting period, 1,429 additional ACW items were destroyed, 426 of which were destroyed by the CDC and 1,003 of which were destroyed by the SDC. To accelerate the destruction of the ACW items, a new destruction facility will be installed in addition to the existing two facilities (CDC and SDC).

The selection of sites in Taiyuan and Guangzhou for the High Mobility Destruction Facility have been finalised, and progress has been made in the consultations between China and Japan towards preparing for destruction operations at these sites.

During the reporting period, excavation and recovery operations and bilateral investigations were carried out at Songhuajiang River in Jiamusi City and in Jixi City, both in Heilongjiang Province. An emergency on-site investigation was conducted in Nanjing City, Jiangsu Province, and an on-site investigation was conducted following the excavation and recovery operation in Mudanjiang City, Heilongjiang Province, where a total of 538 items were recovered and confirmed as ACW. Moreover, at the Haerbaling excavation and recovery site, the second and third phases of the 2019 excavation and recovery operation were conducted in burial pit No.1, and approximately 3,400 ACW items were recovered. In total, 8,240 ACW items were recovered in 2019.

The thirty-first trilateral meeting between China, Japan, and the Secretariat was held in Beijing in December 2019. These meetings are held on a biannual basis and are important occasions for ensuring transparency, discussing technical and practical issues, implementing the projects in accordance with the appropriate verification measures, and planning for future activities.

Finally, the destruction of the chemical weapons abandoned by Japan on the territory of China is scheduled to continue based on the agreed destruction plan, in accordance with which Japan and China regularly report to the Council. The plan includes time frames for the destruction of ACW by Japan, with appropriate cooperation from China. The Secretariat continues to closely coordinate with both China and Japan on the implementation of Council decision EC-67/DEC.6.

4. Progress made for the Destruction of Abandoned Chemical Weapons as per EC-94/DG.19, dated 1 July 2020.

China and Japan have continued bilateral consultations to make progress on the excavation, recovery, and destruction of ACW at various sites in China. Because of the coronavirus disease (COVID-19) pandemic, the number of ACW destroyed remains the same as that reported for the preceding reporting period. At the end of the reporting period (1 February 2020 to 31 May 2020), around 57,700 of the 83,650 items of declared ACW on the territory of China had been destroyed. However, it does not include the items buried at Haerbaling, Jilin Province, which are estimated to number over 330,000 ACW items awaiting excavation and recovery (consisting both of items that have already been destroyed and items requiring excavation and identification), nor does it include items at other locations that also have yet to be recovered and declared.

The national papers submitted by Japan (EC-94/NAT.13, dated 18 June 2020) and China (EC-94/NAT.12, dated 18 June 2020) note that, during the reporting period, all destruction operations and related activities, such as excavations and recoveries, were put on hold because of the COVID-19 pandemic.

Owing to the fact that Haerbaling is the largest burial site of ACW in China, the destruction operations at this site will have a major impact on the overall progress of the destruction of ACW. To expedite the destruction of the ACW items, four new controlled detonation chambers (CDCs) will be installed in addition to the existing two chambers—a CDC and a static detonation chamber (SDC). Construction and civil engineering operations at the Haerbaling destruction site are ongoing in order to host the new destruction chambers, as agreed between China and Japan.

The selection of sites in Taiyuan and Guangzhou for the High Mobility Destruction Facility has been completed. China and Japan have now reached an agreement on the preliminary design of the facility. Although the schedule was delayed because of the impact of the outbreak of the COVID-19 pandemic, progress has been made in the consultations between Japan and China in order to prepare for the destruction operations at Taiyuan and Guangzhou.

The scheduled trilateral meeting between the Technical Secretariat (hereinafter “the Secretariat”), China, and Japan in Tokyo was postponed because of the impact of the COVID-19 pandemic. The Secretariat remains in close contact with China and Japan regarding the latest developments on ACW matters. China and Japan continue to maintain their communication regarding the next phase of the programme of work in 2020.

Finally, the destruction of the chemical weapons abandoned by Japan on the territory of China is scheduled to continue based on the agreed destruction plan, in accordance with which Japan and China regularly report to the Council. The plan includes time frames for the destruction of ACW by Japan, with appropriate cooperation from China. The Secretariat continues to closely coordinate with both China and Japan on the implementation of Council decision EC-67/DEC.6.

5. Activities of the Council

In its decision entitled the “The Deadline of 29 April 2012 and Future Destruction of the Chemical Weapons Abandoned by Japan in the People's Republic of China” (EC-67/DEC.6, dated 15 February 2012), the Council noted that the Governments of Japan and the People’s Republic of China welcome visits of the Chairperson of the Council, the Director-General, and a delegation representing the Council to undertake visits to obtain an overview of the destruction of abandoned chemical weapons (ACW) being undertaken. Invitations are also to be extended to observers for their participation in the Council delegation visit.

Pursuant to the above-mentioned decision of the Council (EC-67/DEC.6), China and Japan jointly invited the Council to visit the Haerbaling ACW destruction site in Jilin Province between 2 and 7 September 2019, as reported in the report of the visit by the Chairperson of the Executive Council, the Director-General, and representatives of the Executive Council to the Haerbaling abandoned chemical weapons destruction site, Jilin province, China 2-7 September 2019 (EC-92/3, dated 8 October 2019).

Further to the decision by the Council at its Sixty-Seventh Session (EC-67/DEC.6) and the destruction plan beyond the year 2016 for the chemical weapons abandoned by Japan in China (EC-84/NAT.6, dated 2 March 2017) attached as Annex 2 to Council decision EC-67/DEC.6, and adopted by the Council at its Eighty-Fourth Session (paragraph 6.14 of EC-84/2, dated 9 March 2017), a national paper by China (EC-93/NAT.5, dated 2 March 2020) and a national paper by Japan (EC-93/NAT.1, dated 13 February 2020) on the overall progress of the destruction of chemical weapons abandoned by Japan on the territory of China were circulated to the members of the Council. (Quoted from EC-93/2, dated 12 March 2020).
