NOTE BY THE TECHNICAL SECRETARIAT

**REPORT OF THE FIFTIETH MEETING OF THE VALIDATION GROUP
FOR THE UPDATING OF THE OPCW CENTRAL ANALYTICAL DATABASE
16 SEPTEMBER 2020**

1. The Validation Group met on 16 September 2020 to discuss the evaluation of new analytical data for possible inclusion in the OPCW Central Analytical Database (OCAD) and to consider matters related to this database. Mr Brian Mayer (United States of America) served as Chairperson of the meeting. Due to travel challenges related to the COVID-19 pandemic, the meeting was held remotely via video conference; subgroup meetings addressing data review were held prior to the main Validation Group meeting.
2. The evaluators for the analytical techniques evaluated new data and reported to the coordinators for each analytical technique. The names of the coordinators who were present at the meeting, along with the technique for which each was responsible, are listed below.

Mr Ferdinand Visser (South Africa)	Gas chromatography (retention index) (GC(RI))
Ms Karin Höjer Holmgren (Sweden)	Mass spectrometry (MS)
Mr Armando Alcaraz (United States of America)	Infrared (IR) spectroscopy
Mr Damian Magiera (Germany)	Nuclear magnetic resonance (NMR) spectroscopy

3. The coordinators provided an evaluation summary of the data to the Validation Group for discussion at the meeting. The evaluators finalised the evaluation of the analytical data and confirmed that the approved data was technically valid.
4. The Validation Group accepted the resignation of Mr Vesa Häkkinen (Finland). He was acknowledged and deeply thanked for his longstanding contributions to the Validation Group. The Group also welcomed to the IR subgroup Mr Adam Bosák and Mr Jan Dědič from the National Institute for Nuclear, Chemical and Biological Protection, Czech Republic, and to the MS subgroup Ms Hanna Hakulinen from VERIFIN (Finland).

5. This report presents the sets of validated analytical data on scheduled chemicals (Annex 1) and non-scheduled chemicals (Annex 2), to be forwarded to the Director-General for appropriate action. The Group also validated data from relevant derivatives (see Annex 3).
6. The Validation Group made some changes to the OCAD naming rules (version 8), copies of which can be obtained from the Technical Secretariat. The changes were made in an effort to clarify the naming rules in the new schedules.
7. Annex 4 to this report lists the members and evaluators of the Validation Group.
8. Available data from all analytical techniques will be sent to the Validation Group at least six weeks before its next scheduled meeting, which is set to take place on 31 March and 1 April 2021. The evaluators agreed to send their evaluation reports to the appointed coordinators no later than 17 March 2021. The evaluators agreed to come to the meeting prepared to finalise the evaluation of the analytical data provided to the Group.

Annexes:

- Annex 1: Lists of Approved Data on Scheduled Chemicals Recommended for Inclusion in the OPCW Central Analytical Database
- Annex 2: Lists of Approved Data on Non-Scheduled Chemicals Relevant to the Chemical Weapons Convention and Recommended for Inclusion in the OPCW Central Analytical Database
- Annex 3: List of Approved Data of Derivatives Relevant to the Chemical Weapons Convention
- Annex 4: List of Members of the Validation Group

Annex 1**LISTS OF APPROVED DATA ON SCHEDULED CHEMICALS RECOMMENDED FOR INCLUSION IN THE OPCW CENTRAL ANALYTICAL DATABASE**

Note: In the “Decision” column of the tables that follow, “A” means “accepted” and “B” means “accepted subject to minor corrections”.
