

**Statement by the Delegation of Japan to the OPCW at the 109th
Session of the Executive Council
Under Agenda Item 6(e)**

We express our concern regarding reports of the possible use of chemical weapons in Sudan.

Japan is paying close attention to the communications between the OPCW Technical Secretariat and the States Parties, as well as the response from Sudan. As a member of the Executive Council, Japan will continue to support the activities of the OPCW Technical Secretariat and expresses its full confidence in the Secretariat's impartiality and professionalism.

Japan underscores the importance of resolving the conflict through non-military means, with due consideration given to the voices of the Sudanese people. We call on all parties to act accordingly to achieve a sustainable peace in Sudan and bring an end to the ongoing humanitarian crisis.
