GENERAL OBLIGATIONS UNDER THE CHEMICAL WEAPONS CONVENTION AND RELATED TASKS

Prioritised checklist for non-possessor States Parties

1. In response to a request made by participants in a regional seminar, a checklist was prepared to help National Authorities streamline their work in order to fulfil their general obligations under the Chemical Weapons Convention. Although the great majority of States Parties do not possess chemical weapons, and although many have no declarable chemical industry, all States Parties will nevertheless need to undertake certain actions in order to fully comply with their general obligations under the Convention.
2. The annexed checklist identifies the basic obligations with which all States Parties need to comply, regardless of whether or not they possess chemical weapons or have a declarable chemical industry. The checklist is prioritised chronologically, and for each specific task associated with these basic obligations, it gives the time frame, the Convention reference (when the time frame is stipulated in the Convention), and the name of the contact person in the Secretariat who can respond to any questions which States Parties might have.

2. Adopt necessary measures to regulate scheduled chemicals and related facilities:
