Tens of Thousands

Unmanned Ground Vehicle

# Civilian Technology in 2003

# Civilian Technology in 2003

# The future?

# Risk-Benefit Duality

# SUSTAINABLE DEVELOPMENT GOALS

# AI contribution to all UN SDGs

Comprehensive analysis to support small producers to find the best markets for their products

# AI contribution to UN SDGs

Analyze trends, make projections about disease outbreaks-to eradicate disease and reduce mortality rates

# AI contribution to UN SDGs

Analyze patterns of student learning and prescribe individual learning plans to improve results

# AI contribution to UN SDGs

Analyze crisis information following or prior to a natural or man-made disaster, allowing appropriate responses to be made

# New opportunities?

Advances in AI and robotics can play an important role for CWC, for example:

**Inspections** in areas too dangerous (contaminated or unfriendly) for OPCW staff or too hard to reach

# New Risks?

*Tokyo, Japan  
April, 2015*

Drone carrying a radioactive material  
was landed on top of the roof of the  
Japanese prime minister's office

# New Risks?

*Various locations in France,  
October, 2014 - February, 2015*

French authorities report multiple occasions of drone flying over nuclear facilities in France at night.

The incident spark independent report by British nuclear expert, warning British authorities that Britain's nuclear facilities are at serious risk of terrorist attacks involving drones.

# An Existential Risk?

# International legal framework

# AI and Robotics at UNICRI

UNICRI AI and Robotics Programme launched in 2015, to:

- develop an **international infrastructure** to identify and understand risks and benefits
- facilitate **stakeholder discussions** (technical experts, policy makers, private sector, academia, etc)
- develop appropriate and informed **international and national approaches** to minimize risks and maximize benefits, contributing to United Nations Sustainable Development Goals (SGDs)

# UNICRI Centre on AI and Robotics

## UNICRI Centre on AI and Robotics in the Hague

... To enhance understanding of the risk-benefit duality of AI and robotics through improved coordination, knowledge collection and dissemination, awareness-raising and outreach activities

# UNICRI Centre on AI and Robotics

... and to provide policy makers with improved knowledge and understanding so that discussion are informed and any resulting policies are balanced

# At the General Assembly

Discussing emerging technologies with academia (Prof. Max Tegmark and Prof. Nick Bostrom) in October 2015 and the private sector (Landon Downs, 1Qbit) in October 2016

# At the General Assembly

## UN Group of Friends of CBRN Risk Mitigation and Security Governance

*“... enhancing international awareness of the current and future capabilities of artificial intelligence and autonomous robotics”*

Ambassador Imnadze,  
Chair of the UN Group of Friends  
New York, 07 December 2015

# At the OPCW

# Training media

Specialized training for journalists and media professionals on Robotics and Artificial Intelligence

The Hague, Clingendael Institute,  
23-24 March 2016

# Training media and security

Next addition: 6-7 February, 2017, University of Cambridge

In collaboration with  
and hosted by

Centre for  
**Risk Studies**

# Thank you!
